

On 01/21/2003 I bought a 1998 Ford Expedition from Cars 4 Less, the vehicle was located on the Daewoo of Sacramento lot. The dealer set up for the vehicle to be financed through Heritage Community Credit Union. The price of the vehicle was \$18,500 plus misc. tax. The final loan amount was for \$21,761.86, with a down payment of \$1,000 (see security agreement). Recently I went to another dealership to trade in the vehicle. After the dealer looked over the paperwork he informed me they could not take the trade-in because I would be upside down in the loan by atleast \$8,000. Once he compared the price I purchased the vehicle for and what the kelly blue book was on it in 2003 he stated that the purchase price was incorrect. He believed my vehilce was powerbooked by the dealership and to contact my lender to find out what type of vehicle they were financing. My lender sent me the kelly blue book on my vehicle that the dealer had sent to them stating what equipment was on the vehicle (see kelly blue book print out). It included three incorrect things: engine size, sound system, and wheels (see pictures). As you can see I am paying for a vehicle that I do not own. As my understanding by law this vehicle has to be bought back by the dealership since they committed fraud. I have contacted the dealership on multiple occasions but the sales manager has not yet returned my phone calls. I would like this matter resolved as soon as possible. Thank you for your time.
